

RANT Web Development Agency: Website Prompt & Content Guide

This document contains everything you need to build the official website for **RANT** (also stylized as **:3 RANT**). It includes a comprehensive prompt that you can feed into AI website builders (like v0, Framer AI, or Webflow), as well as the full copywriting and structure for your site.

1. AI Website Builder Prompt

Copy and paste the text below into any AI website generator or give it to a web developer as a project brief.

Prompt:

"Create a modern, high-converting landing page for a web development agency named 'RANT' (stylized as **:3 RANT**). The agency specializes in building impactful websites for small businesses to help them influence and attract more customers.**Design & Vibe:** The aesthetic should be inspired by retro-tech and cyberpunk elements, using a dark mode theme. The primary background should be deep black or very dark gray, with vibrant neon green accents (hex code: #39FF14) matching our LED matrix logo. Use a mix of a monospace/pixel font for headings to match the retro hacker vibe, and a clean, modern sans-serif font for body text to ensure readability.**Structure:**

1. **Hero Section:** A bold headline about empowering small businesses, a subheadline, and a strong 'Get a Quote' CTA button.
2. **Services Section:** Highlight offerings like Custom Web Design, Mobile Optimization, and SEO.
3. **About the Team:** Introduce the founders—the Main Head of the Team and Prince (Co-owner). Emphasize our passion for helping small businesses grow.
4. **Why Choose Us:** Focus on ROI, customer influence, and modern design.
5. **Footer:** Contact information, social links, and a simple contact form.

The overall feel should be edgy, tech-savvy, yet highly professional and trustworthy for small business owners."

2. Brand Identity & Design System

Based on your logo, here is the recommended design system for your website:

- **Primary Colors:**

- **Background:** True Black (#000000) or Dark Charcoal (#121212)
 - **Accent/Primary:** Neon Matrix Green (#39FF14 or #00FF00)
 - **Text:** Off-White (#E0E0E0) for body text to reduce eye strain against the dark background.
 - **Typography:**
 - **Headings:** A retro, pixelated, or monospace font (e.g., *VT323*, *Space Mono*, or *Share Tech Mono*).
 - **Body Text:** A clean, highly readable sans-serif font (e.g., *Inter*, *Roboto*, or *Open Sans*).
 - **Visual Elements:** Glowing borders, subtle grid backgrounds, terminal-style text animations, and high-contrast UI elements.
-

3. Website Structure & Copywriting

Here is the exact text you can use for each section of your website.

Section 1: Hero (Top of the Page)

- **Headline:** Digital Influence for Small Businesses.
- **Sub-headline:** We are **RANT**. We build bold, high-performing websites that turn your visitors into loyal customers. Stand out from the noise and make a lasting impact.
- **Primary Button (CTA):** Start Your Project
- **Secondary Button:** View Our Work

Section 2: What We Do (Services)

- **Section Title:** How We Help You Win
- **Service 1: Custom Web Development**
 - *Description:* No generic templates. We build custom, lightning-fast websites tailored to your brand's unique voice and goals.
- **Service 2: Mobile-First Design**
 - *Description:* Over half of web traffic comes from phones. We ensure your site looks flawless and functions perfectly on every device.
- **Service 3: Conversion Optimization**
 - *Description:* A pretty website isn't enough. We design user journeys that guide your customers straight to the checkout or contact form.

Section 3: About Us (The Team)

- **Section Title:** Meet the Minds Behind RANT
- **Body Text:** We aren't just developers; we are digital growth partners for small businesses. We understand that as a small business owner, you need a website that actually works for you—building trust and driving sales.
- **Team Profiles:**
 - **[Your Name] – Founder & Head of Development:** The visionary behind RANT, dedicated to crafting digital experiences that leave a lasting impression.
 - **Prince – Co-Owner & Strategist:** The operational force ensuring every project is delivered on time, on brand, and engineered for success.

Section 4: Why Choose RANT?

- **Section Title:** Why We're Different
- **Point 1: Small Business Focus:** We don't chase massive corporate contracts. We exist to give small businesses the enterprise-level digital presence they deserve.
- **Point 2: The ":3" Philosophy:** We combine serious technical expertise with a creative, approachable, and slightly playful edge. We make the web development process fun and stress-free.
- **Point 3: Results-Driven:** We measure our success by your success. If your website isn't bringing you more influence and customers, our job isn't done.

Section 5: Call to Action (Footer/Contact)

- **Headline:** Ready to Make Some Noise?
 - **Sub-headline:** Let's build a website that your customers will love. Reach out today for a free consultation.
 - **Form Fields:** Name, Email, Business Name, Tell us about your project.
 - **Submit Button:** Send Message
-

4. Next Steps for Your Team

1. **Review the Copy:** Read through the text above and adjust any wording to perfectly match your personal voice.
2. **Gather Assets:** Collect any photos of you and Prince, as well as examples of past work (if you have any) to put in a portfolio section.

3. **Build:** Use the prompt provided in Section 1 in an AI builder, or hand this entire document to your development environment to start coding!
